To Potential Sponsors of "Found":

I first encountered the Synergic Theater's innovative work in San Francisco in 1979 and have personally helped to fund its operations ever since. I have been particularly fascinated with the nature and development of their unique use of the shadowscreen medium, having seen both "Ruins" in San Francisco and "Lost" in New York.

In addition to an interest in their productions and process per se, I have found my support to be well applied through responsible management and an ability to use their resources in an efficient and effective manner.

I am enthusiastic about the proposed shadowscreen production "Found" and look forward to seeing how they will apply the medium's evocative imagery to Columbus's discovery of America. I hope other sponsors will join me in helping this very ambitious and exciting project reach its full potential.

Sincerely,

Samuel H. Scripps
